Creating a safe environment for all with elegant wall module

UV WALLBOX is a functional piece of furniture, designed to disinfect all types of objects – even those where alcohol and soap are inadequate. In a time with a strong focus on the spread and control of infections, the wall module is an effective tool for ensuring high hygiene levels.

The product is developed by renowned Danish designer Kasper Salto, who together with EFSEN, experts in UV technology, have devised a solution that combines the best of two worlds.

The result is UV WALLBOX, which utilizes chemical-free technology that, in all its simplicity, neutralizes bacteria and viruses through ultraviolet light. A unique combination of reflective materials and correctly placed UV lamps, provides a 360-degree disinfection of objects such as laptops, toys, teaching materials, and office equipment, in just 10 seconds.

DESIGN & FUNCTION

With its contemporary and simple design, UV WALLBOX is ideal for offices, hotels, educational institutions etc. And it is a decorative and long-lasting investment that can be used to fight common diseases such as colds and flus, or simply used as a storage unit.

Corporate offices are given a unique tool in the aim to keep down the number of infections. The product provides the opportunity to have more employees and visitors in the office, as well keeping down the number of sick days in the long term.

Day care and educational institutions can achieve security and well-being with UV WALLBOX, as well as saving considerable time on daily cleaning procedures.

Hotels, restaurants, and museums have a visually beautiful product to show everyone that new technology is applied to ensure guests' health and safety - and at the same time keeping down the cost of cleaning.

EFSEN is a Danish, family-owned engineering company with more than 35 years of experience in the development of UV technology. We have used our knowledge to develop a series of products to fight bacteria and viruses, even in environments where alcohol and soap are insufficient.

UVC by EFSEN - if you wish to be sure of effective and approved UV technology for the benefit of society and public health.

Specifications

- 230 VAC
- Power consumption 120W
- The UV bulbs have a guaranteed 8,000 hours life
