

# UV WALLBOX

## CREATING A SAFE ENVIRONMENT FOR ALL WITH ELEGANT MODULE

UV WALLBOX is a functional piece of furniture, designed to disinfect all types of objects – even those where alcohol and soap are inadequate. In a time with a strong focus on the spread and control of infections, the wall module is an effective tool for ensuring high hygiene levels.

The product is developed by renowned Danish designer Kasper Salto, who together with UVCbyEFSEN, experts in UV technology, have devised a solution that combines the best of two worlds.

The result is UV WALLBOX, which utilizes chemical-free technology that, in all its simplicity, neutralizes bacteria and viruses through ultra-violet light. A unique combination of reflective materials and correctly placed UV lamps, provides a 360-degree disinfection of objects such as laptops, toys, teaching materials, and office equipment, in just 10 seconds.

With its contemporary and simple design, UV WALLBOX is ideal for offices, museums, hotels, educational institutions etc. And it is a decorative and a long-lasting investment that can be used to fight common diseases such as colds and flus, or simply used as a storage unit.

### TECNICAL SPECIFICATIONS

- 230 VAC
- Power consumption 120W
- 8.000 hours guaranteed life on UV bulbs
- Safety sensor ensures automatic shut-off when the box is opened
- Height: 40 cm, Width: 49 cm, Depth: 39 cm,
- Weight: 15 kg

## CORPORATE / MUSEUMS

are given a unique tool in the aim to keep down the number of infections. The product provides the opportunity to have more employees and visitors in house, as well as keeping down the number of sick days in the long term.
